RECENT WORK

Selena Liu June 2024 - September 2024

Freelance Project

- Designed and built a portfolio site for a set designer
- Worked within the Cargo Collective framework using HTML, JS and CSS

Rhee Studio June 2023 - June 2024

Freelance Project

- Built an ecommerce site for a fashion brand using Shopify Liquid

Inrhythm March 2023 - January 2024

Senior Software Engineer - Consultant

- Worked with Fortune 500 companies, delivering high-quality products within tight deadlines
- Used Stencil to write and compile web components and storybook to demonstrate and describe them as part of a design system for a client

Fero Labs April 2019 - March 2023

Software Engineer

- Using Typescript/React/Redux, Django, and Python with an emphasis on Pandas Library, built and maintained a machine-learning analytics tool for mechanical engineers in industrial production
- Assumed a rotating dev ops role; responsibilities included writing end to end tests, managing releases, and diagnosing/resolving technical incidents
- Collaborated with product and UX/UI designers to write technical documents outlining implementation details of features

Activision January 2017 - February 2019

Lead QA Engineer

- Served as QA Lead for the in-house Video Player and Enhanced Viewing Experience products, wherein I managed regression, exploratory testing, and ticket verification
- Actively managed test cases within a large company codebase
